

In the Claims:

Please amend the Claims as follows (the changes in these Claims are shown with ~~striketrough~~ for deleted matter and underlines for added matter). A complete listing of the claims with proper claim identifiers is set forth below.

1. (Currently Amended) A wiper assembly for a wipes dispenser comprising:
a chassis comprising at least one opening; and
a wiper blade removably attached to the chassis and comprising at least one button; and
the button and the opening coordinating to attach the wiper blade to the chassis.
2. (Cancelled).
3. (Original) The assembly of claim 1, wherein the wiper blade and chassis are connected by an adhesive.
4. (Cancelled).
5. (Cancelled).
6. (Currently Amended) The assembly of claim ~~[[5]]~~ 1, wherein the diameter of the button is greater than the diameter of the opening.
7. (Currently Amended) An assembly comprising:
a wiper assembly comprising a chassis having at least one collar and a wiper blade; and
a wipes dispenser comprising at least one post, wipes and a gap, the wipes having a tail and being capable of being removed from the dispenser by pulling the tail through the gap, and
wherein the collar and the post coordinate to mount the chassis to the dispenser.

~~the wiper assembly comprising a chassis and a wiper blade;~~
~~the dispenser comprising wipes and a gap;~~
~~the wipe comprising a tail;~~
~~the wipes capable of being removed from the dispenser by pulling~~
~~the tail through the gap.~~

8. (Cancelled).

9. (Cancelled).

10. (Currently Amended) The assembly of claim [[9]] 83, wherein the fingers comprise raised areas.

11. (Currently Amended) The assembly of claim [[7]] 83, further comprising a tensioner.

12. (Original) The assembly of claim 11, wherein the wipes are configured in a roll comprising sheets;
the roll capable of being unwound as the wipes are removed, such that less than 6 sheets are retained in the dispenser.

13. (Original) The assembly of claim 12, wherein less than 4 sheets are retained in the dispenser.

14. (Original) The assembly of claim 12, wherein less than 3 sheets are retained in the dispenser.

15. (Original) The assembly of claim 12, wherein less than 2 sheets are retained in the dispenser.

16. (Original) The assembly of claim 12, wherein the sheets retained in the dispenser are configured in a roll having a diameter less than 15 mm.

17. (Original) The assembly of claim 16, wherein the diameter is less than 10 mm.

18. (Original) The assembly of claim 16, wherein the diameter is less than 8 mm.
19. (Original) The assembly of claim 11, wherein the tensioner is a plurality of fins.
20. (Original) The assembly of claim 11, wherein the tensioner is a plurality of rounded ridges.
21. (Original) The assembly of claim 11, wherein the tensioner is a rounded member.
22. (Original) The assembly of claim 11, wherein the tensioner is a wedge.
23. (Currently Amended) A wiper assembly for a wiper dispenser comprising:
a wiper blade; and
a tensioner, wherein the tensioner is a plurality of fins.
24. (Cancelled).
25. (Currently Amended) A wiper assembly for a wiper dispenser comprising: The assembly of claim 23,
a wiper blade; and
a tensioner, wherein the tensioner is a plurality of rounded ridges.
26. (Cancelled).
27. (Currently Amended) A wiper assembly for a wiper dispenser comprising: The assembly of claim 23,
a wiper blade; and
a tensioner, wherein the tensioner is a wedge.
28. (Currently Amended) The assembly of claim 23, 25, or 27, further comprising a chassis;

wherein the chassis can be mounted to a dispenser.

29. (Currently Amended) An assembly comprising:

a wiper assembly; and

a wipes dispenser;

the wiper assembly comprising a wiper blade having fingers and a tensioner;

the dispenser comprising a roll of wipes, guides, and a gap,

the wipes comprising a tail;

the wipes capable of being removed from the dispenser by pulling the tail through the gap; and

wherein the fingers and the guides coordinate to secure the tail of the wipes.

30. (Cancelled).

31. (Currently Amended) The assembly of claim ~~[[30]]~~ 29, wherein the fingers comprise raised areas.

32. (Original) The assembly of claim 29, wherein the roll is capable of being unwound as the wipes are removed, such that less than 6 sheets are retained in the dispenser.

33. (Original) The assembly of claim 32, wherein less than 4 sheets are retained in the dispenser.

34. (Original) The assembly of claim 32, wherein less than 3 sheets are retained in the dispenser.

35. (Original) The assembly of claim 32, wherein less than 2 sheets are retained in the dispenser.

36. (Original) The assembly of claim 32, wherein the sheets retained in the dispenser are configured in a roll having a diameter less than 15 mm.

37. (Original) The assembly of claim 36, wherein the diameter is less than 10 mm.
38. (Original) The assembly of claim 36, wherein the diameter is less than 8 mm.
39. (Original) The assembly of claim 29, wherein the roll is maintained away from the gap by contact with the tensioner when the tail is pulled through the gap.
40. (Currently Amended) A dispenser for wipes comprising:
a roll of wipes; the roll comprising a tail;
a wiper assembly; the wiper assembly comprising a chassis having at least one collar, a wiper blade, and a tensioner;
a cover; the cover comprising at least one post; and
a gap;
wherein the collar and the post coordinate to mount the chassis to the cover.
41. (Cancelled).
42. (Original) The dispenser of claim 40, wherein the tensioner is a plurality of fins.
43. (Original) The dispenser of claim 40, wherein the tensioner is a plurality of rounded ridges.
44. (Original) The dispenser of claim 40, wherein the tensioner is a rounded member.
45. (Original) The dispenser of claim 40, wherein the tensioner is a wedge.
46. (Original) The dispenser of claim 40, wherein the wipes can be removed from the dispenser by pulling the tail through the gap.

47. (Original) The dispenser of claim 46, wherein the roll is capable of being unwound as the wipes are removed, such that less than 6 sheets are retained in the dispenser.

48. (Original) The dispenser of claim 47, wherein less than 4 sheets are retained in the dispenser.

49. (Original) The dispenser of claim 47, wherein less than 3 sheets are retained in the dispenser.

50. (Original) The dispenser of claim 47, wherein less than 2 sheets are retained in the dispenser.

51. (Original) The dispenser of claim 47, wherein the sheets retained in the dispenser are configured in a roll having a diameter less than 15 mm.

52. (Original) The dispenser of claim 51, wherein the diameter is less than 10 mm.

53. (Original) The dispenser of claim 51, wherein the diameter is less than 8 mm.

54. (Currently Amended) A dispenser for wipes comprising: The
dispenser of claim 40,
a roll of wipes; the roll comprising a tail;
a wiper assembly; the wiper assembly comprising a chassis, a wiper
blade, and a tensioner; wherein the chassis and tensioner are being integral;
a cover; the cover comprising at least one post; and
a gap.

55. (Currently Amended) A dispenser for wipes comprising: The
dispenser of claim 40,
a roll of wipes; the roll comprising a tail;

a wiper assembly; the wiper assembly comprising a chassis, a wiper blade, and a tensioner; wherein the wiper blade is removably attached to the chassis;
a cover; the cover comprising at least one post; and
a gap.

56. (Original) The assembly of claim 55, wherein the wiper blade comprises at least one button, and the chassis comprises at least one opening; the button having a diameter greater than the diameter of the opening; and
the button and opening coordinating to attach the wiper blade to the chassis.

57. (Original) A method for dispensing wipes comprising:
providing wipes in a dispenser;
the wipes comprising a tail;
the dispenser comprising a wiper assembly and a gap; and
the wiper assembly comprising a tensioner;
pulling the tail from the dispenser through the gap; and
maintaining the wipes away from the gap by contact with the tensioner.

58. (Original) The method of claim 57, wherein the wipes are configured in a roll, the roll comprising a cigarette.

59. (Original) The method of claim 58, wherein the roll comprises sheets, the sheets defined by lines of perforation separated by a distance of about 114 mm to about 127 mm.

60. (Original) The method of claim 59, wherein the lines of perforations are separated by a distance of about 120 mm.

61. (Original) The method of claim 59, wherein the pulling the tail from the dispenser comprises unwinding the roll of wipes.

62. (Original) The method of claim 61, wherein the cigarette is retained in the dispenser.

63. (Original) The method of claim 62, wherein the cigarette comprises less than 6 sheets.

64. (Original) The method of claim 62, wherein the cigarette comprises less than 4 sheets.

65. (Original) The method of claim 62, wherein the cigarette comprises less than 3 sheets.

66. (Original) The method of claim 62, wherein the cigarette comprises less than 2 sheets.

67. (Original) The method of claim 62, wherein the cigarette has a diameter less than 15 mm.

68. (Original) The method of claim 62, wherein the cigarette has a diameter less than 10 mm.

69. (Original) The method of claim 62, wherein the cigarette has a diameter less than 8 mm.

70. A dispenser for wipes comprising:
means for containing a roll of wipes;
the wipes comprising a tail and a cigarette; and
the means comprising a gap; and
the roll of wipes being capable of being unwound as the wipes are removed, while the cigarette is retained in the dispenser;
means for securing the tail of the wipes in the gap; and
means for preventing the wipes from wedging in the gap.

71. (Original) The dispenser of claim 70, wherein the wipes can be removed from the dispenser by pulling the tail through the gap.

72. (Cancelled).

73. (Original) The dispenser of claim ~~[[72]]~~ 70, wherein the cigarette has a diameter less than 15 mm.

74. (Original) The dispenser of claim ~~[[72]]~~ 70, wherein the cigarette has a diameter less than 10 mm.

75. (Original) The dispenser of claim ~~[[72]]~~ 70, wherein the cigarette has a diameter less than 8 mm.

76. (Original) A dispenser for wipes comprising:
a wiper assembly; the wiper assembly comprising a chassis, a tensioner, and at least one wiper mounting element; and
a cover; the cover comprising at least one cover mounting element;
the wiper mounting element and the cover mounting element coordinating to mount the wiper assembly to the cover.

77. (Original) The dispenser of claim 76, wherein the wiper mounting element is a collar, and the cover mounting element is a post.

78. (Original) The dispenser of claim 76, wherein the wiper mounting element is a post, and the cover mounting element is a collar.

79. (Original) The dispenser of claim 76, wherein the number of wiper mounting elements is equal to the number of cover mounting elements.

80. (Original) A wiper assembly for a wet wipes dispenser comprising:
a first means for mounting the assembly to the dispenser;
the first means comprising a first material;
a second means for contacting the wipes;

the second means comprising a second material;
the second material of the second means being more flexible than
the first material of the first means;
a means for reducing the evaporation of moisture from the wet wipes in
the dispenser; and,
a means for providing tension to the wet wipes so that the wipes can be
withdrawn from the dispenser in a continuous manner without binding or tearing.

81. (Original) A wiper assembly for a wet wipes dispenser comprising:
a first section;
the first section having a length and a width, the length being
greater than the width;
the first section having a front surface and a back surface, the back
surface for positioning adjacent the dispenser;
the first section having a first opening and a second opening; and
a second section;
the second section in contact with the top surface of the first
section;
the second section having an extension;
the extension positioned in the second opening of the first section.

82. (Original) A wiper assembly for a wet wipes dispenser comprising:
a chassis;
the chassis comprising a top edge, a bottom edge, two side edges,
a length, a width, a top surface and a back surface;
the chassis comprising a first and a second collar;
the collars being spaced apart and adjacent to the top edge;
the chassis comprising a plurality of openings; and
a blade;
the blade comprising a top surface and a back surface;

a portion of the back surface in contact with the top surface of the chassis;

the back surface comprising a plurality of buttons;

a portion of the blade extending below the chassis bottom edge;

the buttons positioned in the openings; and

the blade comprising extending members, the extending members not being in contact with the surface of the chassis.

83. (New) An assembly comprising:

a wiper assembly, the wiper assembly comprising a chassis and a wiper blade having fingers;

a wipes dispenser, the wipes dispenser comprising guides, a gap and wipes, wherein the wipes have a tail that is capable of being removed from the dispenser by pulling the tail through the gap; and

wherein the fingers and guides coordinate to secure the tail of the wipes to the assembly.
